

Turn Your Warehouse into a Growth Engine

Produmex WMS

Transform warehousing from cost center to competitive advantage

Produmex WMS, by Boyum IT Solutions, elevates warehouse operations from slow, error-prone tasks to razor-sharp logistics engines. It is a warehouse management system with which you can manage your inventory and increase logistics efficiency while keeping costs low.

Allow it to mimic your warehouse structure and start optimizing its layout, automating tasks for your team to focus on the business goal, access your inventory data in real-time, guarantee you are compliant when operating in regulated industries and scale as your business grows, adapting to new requirements and business operations.

Produmex WMS can be implemented successfully in any industry that relies on warehousing and logistics, and it complements SAP Business One by adding:

1

Traceability & compliance

Full support for GS1, SSCC, GS1-128, batch/serial numbers, and real-time audit trails - for backward and forward traceability, including who, what, when, and where.

2

Extreme accuracy & speed

RF/barcode scanning delivers up to 10x faster operations and over 99% accuracy, versus manual methods.

3

Optimized warehouse space and flow

Mimics your warehouse structure to guide inventory location strategy (fast movers near packing, correct storage for batch and shelf life, maximized space and minimized walks).

4

Seamless ERP integration & visibility

Real-time linkage with SAP Business One ensures complete visibility into receiving, picking, shipping, ASNs, replenishment, and the integration with other systems and solutions powers dashboards and other business areas connected with logistics.

5

Built-in process flexibility & extensibility

Fast configuration of kitting, value-added logistics, container handling, routing, cycle counts and more: no external tools required!

Key benefits

Maximize Space & Flow

- Design warehouse layouts based on product velocity, ownership, and shelf-life rules
- Align receiving, internal transfers, and shipping for smooth, connected processes
- Match storage zones to required environmental or safety conditions

Lower Operational Costs

- Minimize failed deliveries and costly returns through route and order accuracy
- Handle kitting, light assembly, and value-add services without extra software

Increase Inventory Control

- See exact stock levels and locations instantly
- Track every product movement with complete history and responsible user info
- Automate location replenishment and periodic stock checks

Optimize Workforce & Oversight

- Monitor inbound, outbound, and picking tasks in real time
- Use visual performance dashboards to adjust staffing and priorities
- Control task permissions to match staff skills and roles

Social proof

“With Produmex WMS I can see a real quick overview of the stock, the goods coming in and the deliveries that are already made. It's a very useful work tool. It makes my working life easier.”

Lisa Heilen,
Master Batch Record Assistant,
